

Paint Comparison

For those who live in the USA:

These are the current prices (as of February 21, 2015) of the two lowest paint brands that sell super high-peak gel in the actual store.

Liquitex sells 8 ounces for \$15.99. You may get a half off coupon from Michael's that sells this brand, or buy from Michael's online at \$7.99 or a reduced price, but pay shipping.

Nova Color sells 32 ounces for \$13.50. Their prices stay the same whether online or buying in their small factory. Shipping is added, but the quantity is a lot more for less price by selling factory-direct, and not in a chain of craft stores.
